Non-Conference Attendees  
**\$10 per person**

To register, go to:

**[www.issrt.org](http://www.issrt.org)**

Join us as ISSRT Past President and Life Member Paul Laudicina presents his collection of “one-of-a-kind” radiologic images that represent the following categories: artifacts, normal variants, congenital/development abnormalities, diseases, trauma, and foreign bodies. These unique studies all include documented patient histories. Medical and surgical treatments will be incorporated in most of the presented examples.

Paul Laudicina was an active member of ISSRT at both the district and the state level. He has served in numerous capacities as committee chairs and has held numerous offices on the board of directors including President in 1977.

Mr. Laudicina has also served ASRT by serving on several committees at the national level.

Paul is currently best known for his activity on the lecture circuit. He is a highly demanded lecturer at both the national and international level. The wealth of knowledge and experience he has accumulated over the years has allowed him to build a massive radiographic file on pathological, forensic and “bizarre” abnormalities. Together with his uncanny wit and humor, Paul presents his lectures in a way that entralls his audiences and wants them coming back for more.

He is a dedicated educator who thoroughly loved teaching his students. He is a very sensitive, down-to-earth person who has helped to guide our profession. He has a wit and humor that makes him a joy to be around.

Paul Laudicina is an ambassador of goodwill for the profession of radiology; and, promotes our profession and informs individuals about it throughout the world.

**Plan to join us for this dynamic presentation!**
