

# ISSRT 75<sup>th</sup> Annual Conference

## Live Procedure: Endoluminal Grafting (ELG) of an Abdominal Aortic Aneurysm

### Date / Time:

Thursday, April 15, 2010  
8:00 AM - 10:00 AM

### Location:

Bloomington-Normal Marriott  
201 Broadway Avenue  
Normal, Illinois 61761

### Registration:

Conference Attendees:

**FREE**

Non-Conference Attendees:

**\$10 per person**

Dr. Syed Hussain

Dr. Nabeel Rana

"Abdominal aortic aneurysm" isn't a condition you hear about everyday, yet 15,000 Americans die each year from this condition. Abdominal aortic aneurysms may leak or burst, cause life-threatening bleeding and sudden death. A few people may feel pain in their backs as an aneurysm enlarges, however most abdominal aortic aneurysms are "silent"--they enlarge slowly with no symptoms. If detected early, surgery or Endoluminal Grafting (ELG) can eliminate this silent danger 95% of the time.

Join vascular surgeons Drs. Syed Hussain and Nabeel Rana, of Heartcare Midwest, as they perform a live ELG procedure from OSF Saint Francis Medical Center. You will be able to participate in live questions and answers with the physicians during the actual procedure... from femoral cut down to closure.

This is an event you don't want to miss. Enjoy an interesting educational experience with your fellow Radiologic Technologists.

Mark your calendars for Thursday, April 15!
